HABILIDADES

python
Excel & VBA
Matlab
HTML, boostrap, css

IDIOMAS

Rifeño
Español
Ingles
Alemán

🎓 EDUCACIÓN

📅 2010 - 2022
📍 Universidad de Jaén

Mechanical engineering Degree

If you want try it on jsfiddle It starts with a single line and grows only the exact amount necessary. It is ok for a single textarea, but I wanted to write something where I would have many many many such textareas (about as much as one would normally have lines in a large text document). In that case it is really slow. (In Firefox it's insanely slow.) So I really would like an approach that uses pure CSS. This would be possible with contenteditable, but I want it to be plaintext-only.

⚙️ EXPERIENCIA LABORAL

📅 2010 - 2022
📍 AIP Automotive

Django Developer

There was another thread about this, which I've tried. But there is one problem: the textarea doesn't shrink if you delete the content. I can't find any way to shrink it to the correct size - the clientHeight value comes back as the full size of the textarea, not its contents.

ACHIEVEMENTS, HONOURS AND AWARDS

🏆 My first achievement

🏆 My second achievement

GENERAL SKILLS

Tag 1 | Tag 2 | and | another tag | some more tags | yet another one
tags flow over | to the next line | if necessary

Tags must be ordered by hand with newlines to get a nice layout, especially for long tags.

WHEEL CHART

Daytime job

Training

Recovering from fighting criminals

Being Batman

Sleep

ANOTHER SECTION

This page uses the page style `highlightmain` which shows the highlight bar (gray) and the main part (white background) but omits the header. The default page style is `headerhighlightmain` with all three elements. If you don't want header, nor highlight bar, use page style `\pagestyle{empty}`. Neither

main, nor highlight bar must be filled to make this template work. It is possible to use a page style with the highlight bar but leave it empty by setting an empty highlightbar `\highlightbar{}`.

Subsection 1

Demonstrate subsections.

Subsection 2

Subsection are also bold face but a smaller font then section. They also omit the rule.

PUBLICATIONS

Demonstrate what an `\pagestyle{empty}` page looks like. Also show off the macros for publications that uses small icons for authors, date, journal and links.

Achieving a good looking spacing can be tricky. For empty pagestyles where the full width is available use `\pubforcefullwidth` to force the publoication list to take up all the available space. The (relative) lengths reserved for date, journal and links can be set with the parameters `\pubdatelength`, `\pubjournallength` and `\publinklength` as in `\setlength{\pubdatelength}{0.15 \linewidth}`.
